Ver. 1A

Quick Installation Guide

Gigabit Cardbus Adapter

Model # AGIGACB

Package Content:

- Gigabit Cardbus Adapter
- Driver CD
- Quick Installation Guide

Section 1

Installing Hardware

Step 1 Turn on the computer and wait for Windows to boot up.

Step 2 Insert the Cardbus firmly into the Cardbus slot with the LED indicators facing up.

Step 3 Connect one end of the Ethernet cable into an available switch/router port and connect the other end of the cable into the RJ-45 port of the Cardbus.

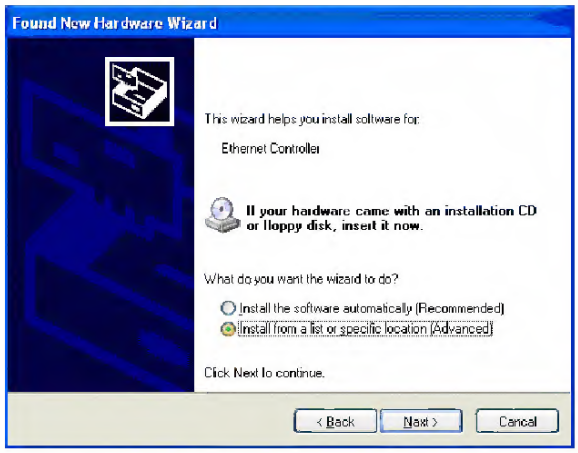
Step 4 Follow the instructions in the next section to install the drivers.

Section 2

Note: The following steps and screen shots are for Windows XP. Steps for other Windows operating systems are included in the **User's Manual** on the Driver CD.

Installing Driver

Step 1 At the **Found New Hardware Wizard**, select **Install from a list or specific location (Advanced)** and click **Next**.



Found New Hardware Wizard
This wizard helps you install software for:
Ethernet Controller
If your hardware came with an installation CD or floppy disk, insert it now.
What do you want the wizard to do?
Install the software automatically (Recommended)
Install from a list or specific location (Advanced)
Click Next to continue.

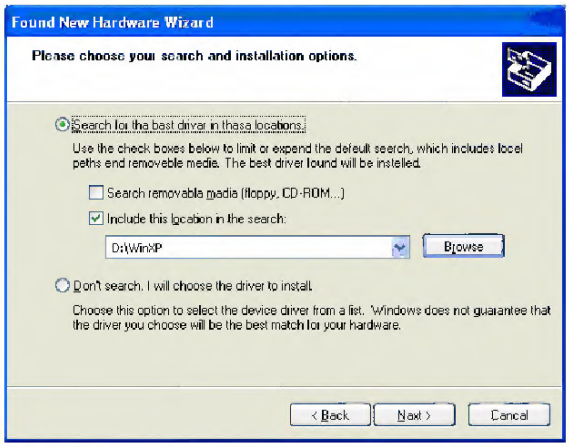
Step 2 Insert the provided Driver CD into the CD-ROM drive.

Step 3 Verify **Search for the best driver in these locations** is selected, and select the **Include this location in the search** check box and click **Browse**. Browse to the CD-ROM drive and select the **WinXP** folder. Click **Next** to continue.



Found New Hardware Wizard
Please choose your search and installation options.
Search for the best driver in these locations.
Use the check boxes below to limit or expand the default search, which includes local paths and removable media. The best driver found will be installed.
Search removable media (floppy, CD-ROM...)
Include this location in the search:
D:\WinXP
Browse
Don't search. I will choose the driver to install.
Choose this option to select the device driver from a list. Windows does not guarantee that the driver you choose will be the best match for your hardware.

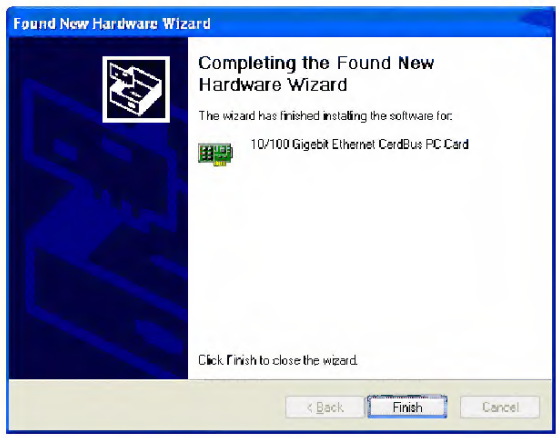
Cancel

Step 4 Click **Continue Anyway** at the Windows Logo Testing prompt.

Hardware Installation
The software you are installing for this hardware:
10/100 Gigabit Ethernet CardBus PC Card
has not passed Windows Logo testing to verify its compatibility with Windows XP. (Tell me why this testing is important.)
Continuing your installation of this software may impair or destabilize the correct operation of your system either immediately or in the future. Microsoft strongly recommends that you stop this installation now and contact the hardware vendor for software that has passed Windows Logo testing.
Continue Anyway
STOP Installation

Step 5 Click **Finish** to complete the driver installation.



Found New Hardware Wizard
Completing the Found New Hardware Wizard
The wizard has finished installing the software for:
10/100 Gigabit Ethernet CardBus PC Card
Click Finish to close the wizard.
